Education and Projects:

Featured Personal Projects

- **Identity Server Employee Tracker**   September – October 2023
  Vue 2 | Vuetify 2 | C# | .Net Core | IdentityServer4
  - This mock full stack application hosts an employee tracker that uses IdentityServer4 OpenId authorization to protect specific routes, such as access to employee information

- **Movie Lookup (Mobile)**   July – August 2023
  Flutter | Dart | Localizations | Global State | iOS/Android OS
  - This mobile app uses the TMDB movie API to allow users to search for and read details about movies in two languages – English and Spanish

- **Movie Lookup (Web)**   July 2023
  Vue 3 | Vuetify 3 | Serverside API's | Render
  - This frontend application uses the TMDB API to allow users to search for and read details about movies, as well as trending, popular, top rated, and movies now playing

University of Toronto School of Continuing Studies

Continuation Courses – C# for JavaScript Developers   March 2023
- **CatWorx Badge Generator** (CSV + PNG Generator)
  C# | .NET Core

Continuation Courses – Java for JavaScript Developers   September – October 2022
- **Just Tech News** (Blog Refactor)
  Java | Spring Boot | Thymeleaf | MySQL

Coding Boot Camp – Web Development (4.0 GPA)   February 2022 – July 2022
- **Fermata** (Group Project – Frontend Travel App)
  JavaScript | Node | Express | MySQL | Sequelize | Handlebars | Heroku
  - Lead team as Project Manager; delivered a "proof of concept" level MVP by implementing a last-minute failsafe alternative to the Spotify API using the YouTube API

- **WeathCon** (Group Project – Full Stack Letter Mailing App)
  JavaScript | HTML | CSS | Bootstrap | Serverside API's | GitHub Pages
  - Lead team as Project Manager; resolved team members' Git conflicts, undoing merged changes to restore lost functionality, and volunteering to restructure application to accommodate group dynamic

- **Locum** (Group Project – Full Stack Employee Management App)
  JavaScript | Bootstrap | React | Mongoose | GraphQL | Apollo
  - Shortlisted as one of 11 Team Leads in a class of ~90 students
  - Debugged an incompatible ES5/ES6 dynamic import/export build error and managed MongoDB Atlas database, avoiding need for complete redeployment when major changes were made post-deployment
